

Bricks 'n Pieces

A magazine for LEGO® Club members

Autumn 1982

All Aboard

Let's go for a ride on the big LEGOLAND® railway

The train passes the LEGOLAND airport

A special feature of the LEGOLAND Park next to the LEGO factory in Denmark is a big LEGO train which you can ride on.

Running from the station near the entrance, the train runs past the safari animals and round the edge of the miniland of LEGO villages and towns. Passing under a bridge the train then chuffs past LEGOREDO, the full size wild west town, before passing through the traffic school, past the LEGOLAND airport and back to the station.

Approaching LEGOREDO

The cars in the traffic school have to give way

For the technically minded, the track gauge is 60 cms. The 3.3 metres long locomotive has a maximum speed of 15 kilometres per hour.

Is it built of LEGO bricks? We must confess that despite appearances it is not. The locomotive and carriages have specially made fibreglass bodies and steel underframes.

For details of Club tours to the LEGOLAND Park in 1983, contact Mrs. M. Scowen, Specialised Tours, Gorsebank House, Gorse Close, Copthorne, W. Sussex, RH10 3PY

Dear Member,

It was great to meet so many of you who were able to get to the Club Rally Day at Milton Keynes in August.

Of course, not all of you were able to get there to join in the fun. But that is what is nice about these Club Magazines—they are another way of making contact between us who work at the LEGO Company and you who enjoy building with the bricks.

We get a real kick out of receiving your letters and photographs of your models and we often pass them round the office for everyone to see, so do keep them coming in.

Here's wishing you many more happy hours of building.

SPECIAL
THIS NEW LEGO
CONTAINER
LORRY

4th Annual Club rally day

Here are some scenes taken at the Club Rally Day at Milton Keynes in August.

Several thousand members managed to get there, some from very great distances. But for those of you who could not make it, we thought you would like to see a little of what went on.

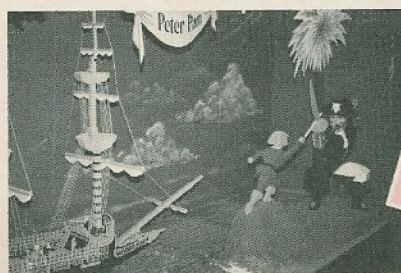

These members are busy working on a record breaking model. In just 1½ hours they built a LEGO model 1-548 km (1,693 yards) long which is the longest LEGO model ever built. We shall of course try to put this record into the Guinness Book of Records alongside the entry for the tallest LEGO tower.

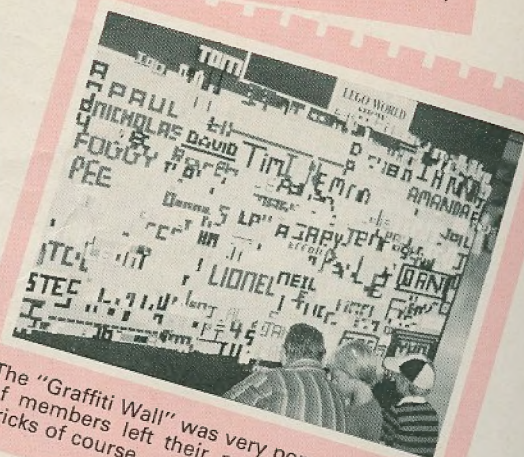

A special feature was the giant Christening Card for Prince William, decorated with LEGO bricks. Members paid 50p to add their design to the card and the money went to the Princess of Wales Charities Trust.

Great LEGO Machine Race. Lots of members brought along their LEGO mobiles, powered by a single rubber band, in an attempt to beat the 135 ft. record set by Marc Holinshead at the Club Rally in Leeds last year. A new record was set by Derek Walker from Preston whose mobile ran 196 ft. 5½ ins. Very close in second place was Mark Stevens from Calne with 196 ft. 4½ ins., just one inch separating 1st and 2nd place. 3rd and 4th place went to Alexander Bowyer from Cambridge on 151 ft. 9 ins. and Gareth Haslinger from Hayes on 119 ft. 6 ins. All very impressive distances.

There were lots of exciting new models to see at the Rally. Pictured here are snippets from The Wild West, Magic Garden and Peter Pan.

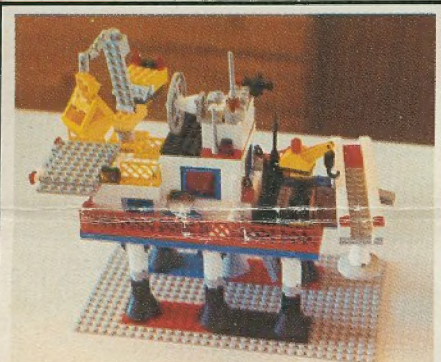

The "Graffiti Wall" was very popular and lots of members left their mark here—in LEGO bricks of course.

Jetcopter A very detailed model from Magnus Cooper age 7 from Andover.

LEGO Quarry A very good shot of the LEGO Quarry in action sent in by Oliver Green age 9 from Guildford.

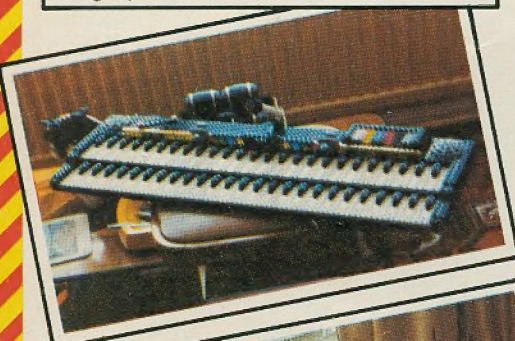

Roller Skate Douglas from Haywards Heath sent us this unusual idea—very well built.

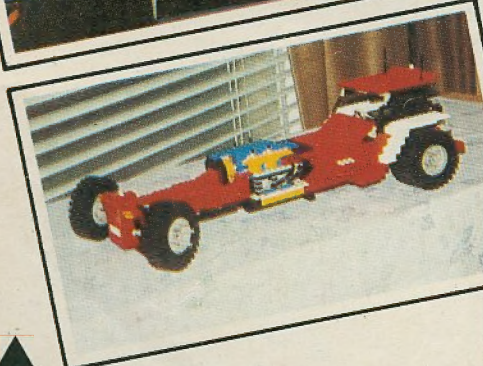

Polycastle Accommodation Rig Gregory Carter age 5 from Peterhead built this model after a visit to the rig. A very good model Gregory.

Mr. Men Mr. Happy, Mr. Strong and Mr. Bump—Adam Youatt age 5 from Arundel made these attractive models.

Tall Ship A very good model from Andrew Diggle age 11 from Warrington.

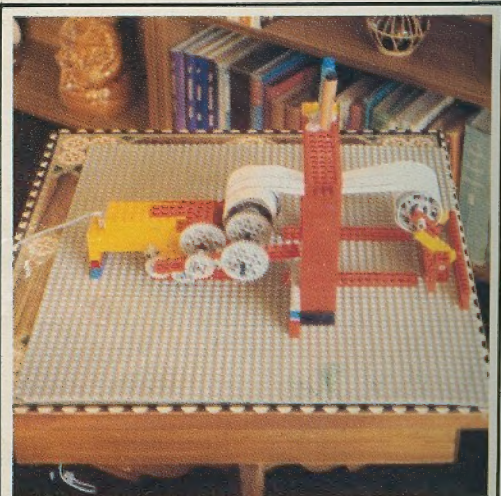

Electronic Keyboard A very well executed model from Alan Lacon age 15 from Walthamstow.

Dragster A very realistic model from Paul Russell age 11 from Perth.

Lawnmower A well designed model from Andrew Fisher age 11 from Halesowen.

Line Drawing Machine A clever working model from Paul de Sa age 10 from Newcastle on Tyne.

AWA

A "golden" Master Builder Badge goes to the person shown here. If you have a photograph of a model, you can become a Master Builder if your model is

◀ **Lumber Wagon** Kevin Mackie age 11 from Balmullo in Fife sent this action shot of his lumber wagon.

Car Transporter Philip Sanders age 8 from Doncaster built this clever model.

◀ **Calculator** A clever idea for a model from Timothy Smith aged 7 from Crewe.

Formula One Racer Peter Trace age 14 from Inverness sent us this very good model racing car.

Cruise Liner Robert Marsh and his Grandad from Cambridge built this superb Ship.

GO® ster der ARDS

Each of the members whose models are special models, send it in and you too could win in the next issue of Bricks 'n Pieces.

Milk Shake Maker Paul Marlow age 7 from Orpington sent this photograph of his superb working model. A good idea for a model, Paul.

Combine Harvester David Croxon age 8 from Penkridge sent us this realistic model.

Welcome Home David Coyle age 6 from Hampton built this unique welcome home card for his mother 'Eurfron' on her return from a trip abroad.

▲ **Jousting Tournament** A very neat model from Christopher Maclean age 11 from Helsby.

Shooting the Rapids Andrew Harkcorn aged 10 from Sheffield sent this good action shot of two canoeists.

PREVIEW

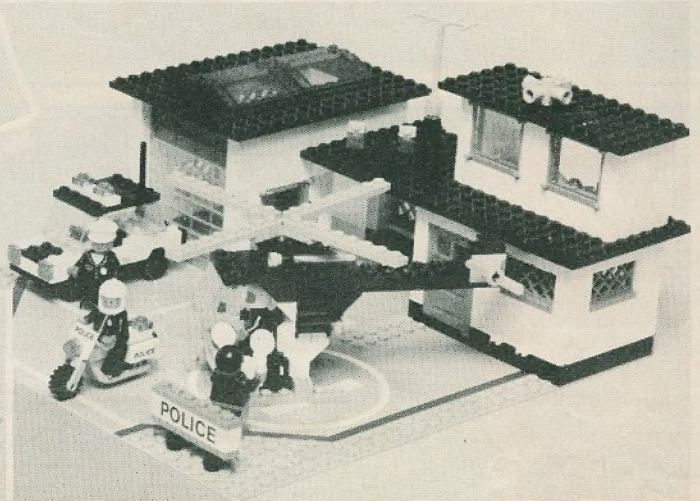

New LEGOLAND Town sets for January

New in the shops next January will be more exciting LEGOLAND Town sets. The largest set is a new Police Headquarters complete with police car, motor cycle and police helicopter—and inside the headquarters is a cell!

There is also a very smart LEGO Container lorry which is available only to Club Members *NOW*—see page 8 for full details of our Special Offer. Remember—with the exception of the LEGO lorry available to members now, these new sets will not be in the shops until January.

Here are two letters from members who win LEGO sets for their original ideas.

FLICK-A-BRICK

Just the thing for a wet day at home or perhaps to play with friends over Christmas is our Flick-a-Brick game.

Easily made from your collection of LEGO bricks, you can play on your own by setting a number to reach in say 10 shots, or with several friends seeing who can make the highest score.

It does not matter if you don't have the same bricks that have been used in the picture because you can build to your own design using the same idea.

LEGO COMPETITION FOR SCHOOLS

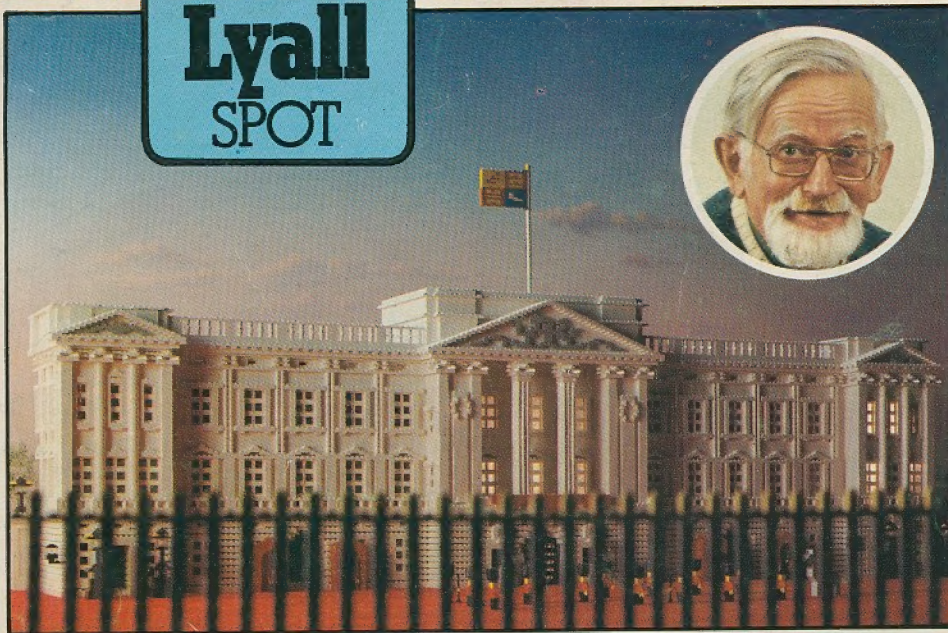

As we mentioned in our Summer edition, LEGO and the schools supply company E. J. Arnold of Leeds are running a National Schools Building Competition.

Involving interesting project themes of 'Space Age', 'History' and 'Our School', there are prizes to be won for schools which enter, and LEGO model designer David Lyall (see page 8) will be one of the judges.

If your teacher would like details of the competition plus a colour poster for the classroom wall she can write to Stewart McMeeking, LEGO U.K. Ltd., Wrexham, Clwyd LL13 7TQ.

THE David Lyll SPOT

Buckingham Palace

This month LEGO model designer David has really surpassed himself with this magnificent model of Buckingham Palace complete with the changing of the guard.

"Buckingham Palace is a model I have always wanted to build", says David "It was fun to build but did take rather a long time".

David's model of Buckingham Palace will be appearing in toy store windows in the months to come so perhaps some of you will have the opportunity to study the model closely.

SPECIAL OFFER

LEGO CONTAINER LORRY £3.95+p&p

This super new LEGO Container Lorry won't be in the shops until January, but it is available to Club Members right now at a special price of only £3.95 plus 25p post and packing.
